DIARY NOTES

DD/S

31 August 1965

I spoke with Matt Baird about the Office of Training participation in in-house training of NPIC personnel, in particular, photo interpreters and specialists of this nature. Matt said he had furnished two Training Officers to NPIC and he thought they could organize a training program. I disagreed with this view and told Matt that setting up the training program required much more staff and management than two Training Officers. I told him that I thought the Office of Training, with its staff and experience in organizing training programs, could set up a program and call upon specialists within NPIC to conduct the actual instruction. As I see it, NPIC's recruitment program will last for some years and an organized training schedule will have to be established. Matt accepted my views and we will have further discussions on the matter after we get together with Paul Borel [REDACTED] concerning NPIC's future recruitment schedule.
